

# Classic SoundStik Systems

**T**ell your visitors the story of your exhibit full blast! Give them whatever it takes—jazz bands, train whistles, or mountain lions roaring! You won't disturb anyone, because sound does not spillover into the gallery—not even a rumble.

With Classic Tethered **SOUNDSTIK**® Systems, the visitor just lifts the SoundStik from its hanger and listens. Any audio source may be used. Messages can be synchronized with lights, video and animation. Sound comes through clear and crisp, even in noisy trade show halls, because the message is delivered directly to the ear.

## Typical Applications

- Video Kiosk Clusters
- Audio Upgrade for Static Exhibits
- Multi-Language Messages
- Teacher Override to Speaker for Classroom Visits
- Interactive Exhibits
- Accessibility for Hearing and Visually Impaired

Backed by 30 years experience working with exhibit designers and builders, Vista Group's innovative audio systems will help you delight today's multimedia savvy visitors.

# CLASSIC SOUNDSTIK SYSTEMS

It's as easy as Look! Listen! and Enjoy!

Your interactive exhibit experience is always ready for every visitor—whether it's simply one stuffed warbler singing at a local nature center, or 15 warblers singing on demand with synchronized spotlights and foreign language explanations.

## How It Works

Just lift the SoundStik from its hanger and listen. Sound may be running continuously, started upon pickup, with push buttons, or controllers. No staff is needed to hand out and retrieve equipment.

Visitors with hearing and visual impairments appreciate the alternative to labels and loud speakers

## Options

Colors: Black or Light Gray  
Cords: Black or Light Gray Coil Cords,  
Black Chrome or Stainless Armored Cable  
Hanger Mounts, Message Start Switches, DMR's, PLC's

## Custom System Kits

Turnkey systems designed to work with your existing equipment or as stand alone systems including:

- Digital message repeaters loaded with the message or ready to record on site.
- Programmable logic controllers for synchronous control of sound, animation and lights.
- Mounting hardware, wiring, amplifiers if required and connectors.  
All parts are labeled and ready to plug in.

## Message Production

Vista Group offers a full range of message production services: script writing, editing and production, or conversion of your audio or video media.

## Service and Parts Available

As with any device used and abused by the public, some maintenance will be necessary for handsets, push buttons and switch mechanisms. DMR's and PLC's are maintenance free and extremely reliable. SoundStik Warranty: One Year.
