

SoundPost Systems

When your story is bigger than your sign, add cannon fire, battle hymns, soldiers reading letters from home.

Digital SoundPost systems from Vista Group let outdoor signs do more. They welcome your visitors to current attractions. They become naturalists helping visitors recognize bird songs. They offer interpretation to the blind and present your message in multiple languages.

Typical SoundPost

- Messages are stored on digital message repeaters. No moving parts to wear out.
- Push buttons or keypads start messages.
- Weatherproof speakers.
- Durable, coated aluminum base and graphic panel frame.
- Electric or solar powered.
- Concrete pad or in ground mounted.

Reliable outdoor audio is an oxymoron no more. With the combination of weatherproof graphic structures and today's maintenance free audio technology, your special story will be ready for every visitor.

Digital SoundPost Systems

Even if you can't have an outdoor storyteller everywhere you'd like one, a sign can tell your story in a personal way. With Vista Group's SoundPost Systems housing digital audio in a durable weatherproof structure, your entertaining commentary will be performed professionally rain or shine.

Messages can be any length or multi-level to suit both the browser wanting only an overview and the more inquisitive visitor seeking more information. Foreign languages are easy to add. The clear, crisp messages benefit everyone and provides access to visitors with handicaps.

How It Works

A standard system consists of a durable, coated aluminum base, maintenance free digital message repeater, and weatherproof speaker.

The graphic panel frame is designed to accept a customer supplied graphic, 16" x 20", that can serve as a visual cue accompanying the script.

Message Repeaters

- Maintenance free, solid state, digital sound
- On-site recordable for frequently changing messages
- Random message selection
- Holds message even if power goes off

Options

- Push button, token, keypad, or motion detector start
- Solar, battery or line power operation
- Choice of color

Message Production

Vista Group offers a full range of message production services: script writing, editing and production, or conversion of your audio or video tapes.

Maintenance

Service contracts are available. As with anything used by the public, some maintenance will be necessary. Digital message repeaters are maintenance free and extremely reliable.
